

**HIGH POWERED SOLUTIONS FOR  
RF AND MICROWAVE APPLICATIONS**

## **CORPORATE PROFILE**

---

**Manitou Systems Inc.** is a privately held high technology company specializing in the area of RF, DC and microwave power systems & advanced plasma source design, engineering and, manufacturing. The company's products are sold to the semiconductor, flat panel display and industrial marketplace.

Located in Danbury, Connecticut, we operate a 12,000 ft<sup>2</sup> corporate and manufacturing facility. Manitou Systems markets its products in the USA and on a global basis through direct and independent sales representatives.

Manitou Systems rapid growth has been fueled by the demands of the semiconductor, thin film coating, and flat panel display industries. The company's manufacturing and service facilities have been expanded with additional throughput capacity to meet these ever increasing needs.

**We are pleased to offer the products listed below.**

**Please visit the Manitou Systems website to download individual data sheets.**

### **RF Plasma Power Systems**

- **HELIUS™** RF power generators — 100 watts to 25 kW at 50 kHz to 100 MHz
- **ACCU-MATCH™** Automatic, manual & fixed impedance matching networks
- Power splitters, switch boxes, cables & accessories

### **Microwave Power Systems**

- **HELIUS™** Microwave power generators — 300 watts to 6 kW at 2.45 GHz
- Wave guide components — stub tuners, isolators, loads & detectors
- Power splitters, switch boxes, cables & accessories

### **RF Plasma Sources**

- **Delta Glow™** RF excited high energy source
