

C1-C2 .01uF
 D1-D2 1N4001
 K1-K2 VACUUM RELAYS - SPDT Jennings RJ4B-26B

Operation Information

This unit requires 24VDC to power the relays. Apply the negative polarity to pin 5. Applying the positive polarity to pins 1 & 2 will energize the associated relay or relays.

- To operate Cathode 1 do not apply voltage.
- To operate Cathode 2 apply voltage to pin 1.
- To operate Cathode 3 apply voltage to pins 1 & 2.

CAUTION

This unit is not interlocked to prevent hot switching. The user is responsible to ensure that this unit is not operated in a manner which will cause damage to this or other equipment.
